

Meet the new ZEBRA token.

Each token unlocks special rewards

And each token is unique

It's a power-up for your crypto!

Cool, right?

The \$ZEBRA Paper

As more people adopt Bitcoin in India, they become more aware of cryptocurrency as a whole. For us at ZebPay, now is the ideal time to add to our investors' experience with the introduction of a new kind of digital asset.

We want to give back to the users who trust us with their crypto. You make ZebPay what it is.

We'd like to introduce **\$ZEBRA**, a collectible token for the ZebPay ecosystem. When you hold a \$ZEBRA token, you unlock special rewards such as discounts on fiat-crypto and crypto-crypto trading.

It's not just India's first NFT, but also a token that benefits you as you trade.

Unlike Bitcoin, where each individual coin is uniform, replaceable and holds the same value - ZEBRA tokens will differ from one another. The specific benefits each token will provide will depend on the unique characteristics of the token itself.

We're starting with discounts on trading and free membership, with **plenty** more benefits in the pipeline.

All you need to do is add your token to your ZebPay wallet. Once it's there, all the benefits take effect automatically.

So how do you get your hands on a \$ZEBRA token?

If you have placed at least one successful trade on ZebPay since March 2020, you have nearly a 1% chance of receiving a token via airdrop. Once the airdrop is complete, feel free to trade your NFTs on ZebPay - the same way you buy and sell crypto.

It's that simple.

Simple. Secure. ZebPay.
